ELIF BERAA ÇIĞRIKÇI

Software Engineer & AI Researcher

Software engineering graduate with practical project experience in AI, machine learning, and robotics. Took on responsibilities in national tech teams and actively participated in international research programs. Aims to translate this knowledge into practical solutions in data science and digital innovation.

LinkedIn: Elif Çığrıkçı
Languages: English (C1 - Advanced)
Core Skills: Python, Machine Learning, Deep Learning, Project Management, Teamwork

PROFESSIONAL EXPERIENCE

AI Engineer Intern | **Sep 2025 – Nov 2025**
BLUESENSE

- Contributed to developing a computer vision model for Bluesense, participating in data preprocessing, annotation, and model training, and built model pipelines using PyTorch and TensorFlow.
- Tuned hyperparameters, mitigated overfitting/underfitting to improve model performance, and addressed class imbalance in training data via oversampling and undersampling techniques.

Software Development Intern | **Jul 2025 – Aug 2025**
TechBros

- Contributed to data-oriented R&D projects including Data Warehousing, Business Intelligence, and Big Data Analytics, optimizing data processing and visualization workflows.
- Supported implementation of advanced analytics solutions and collaborated with cross-functional teams to foster data-driven decision making.

Global Social Media Management (Part-Time) | **Jun 2024 – Present**
Yıldız Holding

- Managed global social media accounts and monitored customer satisfaction metrics across international channels.

Artificial Intelligence Internship | **Aug 2024 – Sep 2024**
Yazılım.xyz

- Contributed to ML models for NLP and classification tasks with potential applications in automotive automation, utilizing Python to preprocess data and evaluate algorithms.

Instructor-Mentor at Deneyap Technology Workshop | **Feb 2023 – Feb 2024**
T3 Foundation

- Delivered interactive workshops aligned with the national tech curriculum; trained and supervised students in 12+ modules covering AI, robotics, and mobile apps.

EDUCATION

Istanbul Sabahattin Zaim University | **2021 – 2026**
BSc in Software Engineering

- Board Member, IZU Innovation Club (Organized AI & innovation summits, mentored students in TEKNOFEST/TÜBİTAK/Erasmus+).

Cihangir Schools | **2016 – 2020**
High School Diploma (Scholarship)

PROJECTS & RESEARCH

Multi-Modal Federated Learning (Thesis)
Developed a federated learning architecture across distinct medical datasets using FedProx; authored two research papers for IEEE publication.

Erasmus+ Youth Projects (5 Total)
Co-authored "Inoverde" project (€38,000 EU grant). Attended international exchanges in IT, DE, ES, NL focusing on sustainability.

TÜBİTAK 2209-A & TEKNOFEST Projects
Built AI-driven diagnostic model for psychiatric disorder detection using multimodal input (face, voice, speech). TEKNOFEST 2025 semi-finalist.

Pipe Struggle – Unity Game Project
Created an action-adventure game with Unity and C# within the Google Game Academy program.

CERTIFICATIONS & HONORS

Machine Learning Specialization
Coursera (Stanford)

Game Programming with Unity & Project Management
Coursera (Google) & Udemy

1st Place Winner – IDEA4TRAVEL Ideathon | 2025
Turkish Airlines

Instructor-Mentor Scholarship | 2023 – 2024
T3 Foundation
